

AI-NATIVE · PURPOSE-BUILT FOR SCHOOLS

The AI Operating System for Schools

One intelligent platform that runs your entire school — academics, exams, attendance, fees, HR, transport, safety and parent communication — with AI woven into every corner. Ask it anything, even by voice, and it answers.

PREPARED FOR

< **Your School Name** >**1100+**

schools already running

Since 2017

9+ years in schools

AI

already live in production

THE SHIFT

Your school doesn't need more software. It needs an operating system.

Most schools run on a patchwork — one tool for fees, another for attendance, spreadsheets for exams, WhatsApp groups for parents. The data never talks. Staff re-enter everything. And nothing is actually intelligent.

Typical school software

Separate, disconnected tools

Same data entered again and again

Reports built by hand, late at night

'AI' that is a demo, not a daily help

Parents kept in the dark

An AI Operating System

One connected system for the whole school

Enter once — it flows everywhere

Report cards & documents auto-generated

AI that works quietly in the background

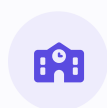

Parents updated automatically, in real time

An operating system doesn't just **store** your school's data — it **runs** on it, and works **for** you.

WHY SCHOOLLOG

Built **for** your school — not adapted to it.

Schoollog isn't a new experiment. It is the distilled result of running real schools, every single day, since 2017 — 9+ years. That experience is now built into the platform your school will use.

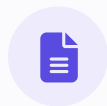

1100+
schools live

Stable and proven — running real schools daily, not a pilot.

18,000+
real issues solved

Every problem your school will face, we've already seen and fixed.

800+
report-card formats

Your board, your exact format — no compromise, no workaround.

IITian-led
AI research team

Built by IITians with career educators — deep tech meets real school know-how.

Every board, first-hand — and NEP 2020-ready. CBSE, ICSE, State, IB and IGCSE: what each one needs, how each exam and report card must look, holistic NEP report cards included. Compliance is our home ground.

★★★★★ **4.8 / 5** — rated by 1000+ schools using it every single day.

WHAT MAKES IT DIFFERENT

Not software you operate. A system that operates **with** you.

Three things turn a collection of features into a true operating system for your school.

One connected platform

Admissions, academics, exams, attendance, fees, HR, transport and communication in one system. Enter data once; it updates everywhere.

AI woven into every workflow

AI isn't a bolt-on tab. It lives inside daily tasks — building timetables, drafting report cards, answering staff and parents.

Trained on YOUR school

The AI learns your curriculum, your books and your boards — so its help is specific to your school, not generic.

Most “AI ERPs” are yesterday's software with a chatbot bolted on top. **Schoollog is AI-native** — every feature built from scratch, not patched onto a legacy system.

AI EVERYWHERE

AI, working across your **whole** school.

Not one “AI feature” — intelligence built into the tasks your staff do every day.

AI Timetable Builder

Clash-free timetables in minutes, with instant substitutions.

AI Question-Paper Generator

Board-style paper + answer key from your syllabus in 60 seconds.

AI Teaching Assistant

Lesson plans, notes and teaching material drawn from your syllabus.

Auto Report Cards & Documents

Report cards, TCs, certificates and letters produced automatically.

Face-recognition Attendance

Point a phone at the class — marked, absentees notified in seconds.

Doubt-Solver for students

Students snap a question, get worked steps mapped to their chapter.

Predictive Early-Warning

Spot at-risk students weeks before drop-out or failing grades.

AI-Assisted Grading

A first-pass on handwritten answer sheets — cut grading time in half.

PTM Assistant

AI meeting briefs and talking points for every parent meeting.

Smart Data Migration

AI reads years of old records — even scanned files — and organises them.

No-code Automations

Trigger workflows across modules by plain intent — no code.

Principal Intelligence Dashboard

Your whole school at a glance — no one has to build a report.

PERSONAL TO EVERY PERSON

One AI — personalised for **every** stakeholder.

Everyone who touches your school gets their own intelligent assistant — tuned to their role.

Copilot for every staff member

Ask in plain Hindi or English — search, draft and act, with a confirmation before anything sends.

Action Center for every stakeholder

Principal, coordinator, teacher, parent and student each see a personalised to-do & priority list.

AI Bot for parents

Parents ask anything — fees, attendance, homework, timetable — and get instant replies.

Voice assistant — ask anything

Just speak. “How many present in Class 8 today?” — and it tells you, out loud.

Trained on your curriculum & books

AI aligned to your syllabus and textbooks — genuinely personalised teaching help.

Classroom & teaching insights

Track syllabus pace and teaching quality — support teachers who need it, early.

PARENTS FEEL CLOSE

Not just admin AI — AI that makes parents feel **close** to school.

Attendance and fees keep a school running. These engines keep parents inside their child's day — without a teacher lifting a finger.

Student Highlights

A one-line teacher note becomes a story parents actually read — AI-drafted, teacher-approved, sent to app & WhatsApp.

Achievement Alerts

Top scores, most-improved, attendance streaks, competition wins — auto-detected and notified the same day.

Classroom Moments

A photo, a tag, a caption — ten seconds for a teacher, instant for a parent. No lost photos in a group chat.

My Child's Timeline

Attendance, homework, fees, highlights, achievements — one feed per child, not six tabs to check.

Where parents already are — not another app to install

Every alert, reminder and fee link reaches the Schoollog app and WhatsApp. Parents pay in two taps (UPI, cards, netbanking), and circulars go out in Hindi, English or regional languages.

EVERYONE ALIGNED

One source of truth — a clear view for **every** role.

Everyone sees exactly what helps them do their job better. Transparency that **empowers** your team and builds trust — a shared, honest view, never a tool to watch anyone.

Directors & Management

The full picture, live — fees, admissions, attendance and results across every campus. Transparent and audit-ready: protect every rupee and lead with confidence.

Principal

Your whole school at a glance. Less firefighting, faster decisions — one console instead of chasing ten reports.

Coordinators & HODs

Academics on track — without micromanaging. See syllabus pace and class health, and support early where it's needed.

Teachers

Less paperwork, more teaching. AI drafts report cards, marks attendance and answers parents — and your good work gets seen.

Parents

Close to your child's day — real-time highlights, one feed, and fees paid in two taps.

Students

Support in hand — doubt-solver, timetable, homework, and their own profile & CV.

Accountability that feels like support

When everyone works from the same live data, good work gets recognised, gaps get help early, and nothing important slips — by design, not by surveillance.

EVERYTHING A SCHOOL NEEDS

100+ modules. One platform.

A complete, already-built catalog, organised the way a school runs — whatever you think of, it's already inside.

	Academics & Teaching	Academics & Timetable Syllabus & Lesson Plans Exams & Report Cards (NEP-ready) All Boards (CBSE·ICSE·State·IB·IGCSE) Online Classes Teaching Material Library Homework & Diary
	Admissions, CRM & Growth	Pre-Admission CRM Lead Management & Nurturing Campaign Management Admissions & Onboarding Dynamic Forms Digital Marketing
	Attendance, HR & Payroll	Face-attendance & Biometric Devices Access Control Transport Attendance Smart HRMS Payroll & Leave Staff Appraisal & Feedback
	Fees, Payments & Accounts	Fees & Finance Payment Gateways Audit-ready Accounts Tally Integration Connected Banking Expenses & PDC Canteen & Store
	Transport, Hostel & Safety	Transport & Live Tracking Hostel SafeExit Gate Pass & Visitors ID Cards Health & Infirmary CCTV & Security

	Operations & Insights	Student Profile & CV Builder Stock & Inventory Task & Process Workflow Certificates & Documents Alumni Management Principal & Coordinator Dashboards Reports & Analytics Data Migration

...and 100+ in all. After Schoollog, your school needs **no other software or tool**.

MORE THAN A PRODUCT

A partner that stays — long after you go live.

The software is only half of it. What makes schools stay with us for years is everything around it.

All-in-one — 100+ modules

One platform for everything. No other tool to buy, learn or stitch together.

Your school's own branded apps

Parent, staff and student apps in your school's name and logo.

Easy to adopt — near-zero training

The AI copilot tells staff what to do, how — and does it. Anyone can run it.

After-sales service that's our pride

Support doesn't stop at go-live — it's the reason schools stay for years.

A dedicated support team

Real people who know your school, always a call or message away.

Easy integration

Tally, payment gateways, Zoom & Google Meet, GSuite — plus biometric, RFID, face-attendance & access-control devices.

Running a school group? One console for every campus

Consolidated Chairman dashboards, set policies once and roll out everywhere, compare campuses side by side — powering 40+ multi-campus groups across India.

Genuine value for money

One platform, one relationship — instead of ten tools, ten bills and ten support desks. 1100+ schools already trust it every single day.

SECURE, RELIABLE & YOURS

Your school's data — safe, and truly yours.

A school runs on trust. Schoollog protects it at every layer — and the intelligence it builds on your data belongs to your school.

Built for data protection — DPDP Act ready

Consent-based and role-restricted. Your data stays in India, encrypted at rest and in transit, isolated per school, fully logged — and never sold or shared. Privacy by design.

Role-based access

Every person sees only what their role allows — nothing more.

Logs of everything

Full activity, login and change logs — nothing is a mystery.

Automated backups

Regular, safe backups of everything — records never at risk.

Isolated per school

Your data is walled off — never mixed with anyone else's.

Dedicated analytics engine

A separate analytics database powers dashboards without slowing daily work.

Your school's own AI

A private model trained on your school's data — your intelligence stays yours.

WHAT YOUR SCHOOL GAINS

Less admin. More clarity. Happier parents.

Hours back, every week

Staff stop re-entering data and hand-building reports.

Parents who trust you

Real-time updates build confidence and reduce complaints.

Always board-ready

Exams, report cards and records that match your board, always.

A switch with zero data loss

Your entire history moves over — safely and completely.

Switching is effortless

Go live in weeks, not months. We migrate your past data, set up your classes and boards, train your staff, and stay beside you well after go-live. You are never left to figure it out alone.

SCHOOLLOG

Let's set up your school's AI Operating System.

A short, personalised demo — mapped to your board and your school — is the best next step. No commitment, no cost to see it.

1

Personalised demo

See it running for a school like yours.

2

Requirement mapping

We map your boards, classes and needs.

3

Onboarding & migration

We bring your data in and train your team.

4

Go live

Your school runs on its new AI OS.
